

I changed that back ground color of the car from #CD5C5C to #A03131 because it helps with reading, I also changed the navigation bar background color from #BC8F8F to #7C4B4B to also make it easier to read.

I added captions under my videos, images, and audio; just in case people are unable to hear the audio and video but to also further explain the purpose of each media.

I increased the text sizes to so that people who are farsighted and help them be able to see things on the website.
